Re: Web Developer Opening (Job ID: BHJOB5092_688)

Dear Mr. Jacob Rotkovich,

I was excited to see see your opening for an in-house web developer position, and I hope to be invited for an interview.

My background includes working in the restaurant industry as a server and server trainer. In the restaurant industry the environment is very fast paced. Because of my previous experience working in fast past environments, being able to adapt and shift priorities comes naturally to me.

Most recently, I've worked as a web & marketing coordinator. I was responsible to daily maintenance of the companies website. Working with the sales department to create email campaigns based on popular products.

In addition to my experience in the restaurant industry, I have gained a considerable amount of communication skills during my employment as a server.

I also bring to the table strong programming proficiencies in PHP, jQuery, Javascript, HTML5, and CSS3. Additionally I've worked with Adobe Photoshop, responsive design concepts, and my attention to detail is very high. Please see my accompanying resume for details of my work experience and education.

Sincerely,

Ryan Morrow
